2. What are the different ways you can select columns and rows?

Ans:-

- To select the column quickly, Press Ctrl+Space
- To select the column, drag the mouse to the column name. down side Arrow will be shown. Click it. The column will be selected.
- To select the Row Quickly, Press Shift+Space
- To select the row, drag the mouse to the Row number. Right side Arrow will be shown. Click it. The row will be selected.

3. What is AutoFit and why do we use it?

Ans:-

AutoFit feature is used to automatically resize cells in a worksheet to accommodate different sized data without having to manually change the column width and row height.

4. How can you insert new rows and columns into the existing table?

Ans:-

- Select Cell around which you need to insert the row or column
- Click Home > Insert > Select what you want to insert

5. How do you hide and unhide columns in excel?

Ans:-

- select Column which you need to hide
- Click Home > Format > Hide Unhide > Hide Columns / Unhide Columns

6. Create an appropriate table within the worksheet and use different functions available in the AutoSum command.

Ans:-

- SUM
